

Custom barrels for your Thompson/Center™ Contender®/G2® and Encore® pistol and rifle

Bullberry barrels have many features not found with original factory or other after-market barrels:

- Premium quality Stainless Steel and Chrome-Moly blanks, CNC turned for a non-stressed barrel of unbeatable performance
- Wide choice of barrel lengths
- Comprehensive selection of calibers
- High polish, semi-matte ScotchBrite® or matte finishes
- Variety of contours
- Original free-floating forearm hanger system
- Recessed 11° bench-rest crown
- Drilled and tapped for scope and/or iron sights as requested
- Chambers precision cut and polished to minimum dimensions
- Bullberry integral muzzle brakes – our brakes are proven to reduce recoil 60-80%
- Guaranteed accuracy . . .

. . . Yes, accuracy is guaranteed! When used with our Woodsmith® forearm system our Contender® and Encore® barrels must give sub-MOA accuracy. This basically converts to a 5-shot group under one inch at 100 yards. If accuracy is not as specified you will receive a full refund of the cost of the barrel or a replacement barrel.
