

Should you have any questions about our custom production process or our products please do not hesitate to contact us by phone or email. We take tremendous pride in our customer service and will be happy to answer any questions you may have along the way.

Purchasing an action?

If you are interested in purchasing an action/frame from us and are outside the state of Utah we require a Federal Firearms License from a dealer within your state in order to process the appropriate action transfer and complete delivery. Such orders within Utah must be completed in-house or sent to your local FFL-holding dealer for transfer.

Shipping:

Orders to the contiguous 48 states are shipped via FedEx Ground services. Shipping and handling charges are based on the delivery Zipcode, business versus residential delivery, and the merchandise value, including insurance for full product value.

You may request your order be shipped via US Mail at current postage rates, including insurance.

Small part orders under \$25 will ship via USPS Priority Mail at current rates.

Return shipping charges for service items are determined based on combined insurance value of the product(s) and service fees.

Express services are priced at your request.

Exportation:

Bullberry does accept international orders for barrels and other accessory items. Transfer over country lines and final shipment occur via third party exportation facilitators who hold all necessary licensing. For more information on this process please contact Jean. To date we have worked with three different exporters, for customers on four continents.

About our ordering process:

Our leadtime on custom barrels varies by shooting season, but you can typically anticipate receipt of your custom barrel order in four months. Three to four weeks before your order is scheduled for completion we will contact you because your order has come to the top of our queue and is ready for production. We verify all order features before production begins, so be sure to contact us if we leave you a message or send an email about production.

At that point we will add your order to our current production run, along with another 25 or so custom barrels. Each run may range in caliber from 17 rimfire all the way up to black powder barrels, as we produce orders by date, not caliber.

Order balances are due prior to the start of production. Payments on all orders can be made by Visa, MasterCard, American Express, Discover Card, personl check, Money Order or Cashier's Check.

Deposit payments are only required on special order barrels (non-refundable) and third party accessories such as frames, scopes, etc.

What is the Bullberry hanger system?

Apart from our high quality blanks and tight tolerance chambers, the Bullberry hanger system is the key to our long-standing accuracy guarantee and the success of many shooters. The Bullberry hanger system is included on every Contender®/G2® and Encore® barrel ordered directly from us.

Purchased separately, hanger bars are \$12 including all necessary attachment hardware; specify standard or long bar (for T/C Contender® carbine & rifle barrels).

Hangers are also available for non-Bullberry Encore barrels, but require an alteration to the barrel itself. We will precisely cut two dovetail cuts in the bottom of your barrel, then install two threaded inserts on which your new hanger will mount. Your Bullberry forearm will then free-float from your existing Encore or ProHunter barrel. The barrel alteration, including the appropriate hanger and all necessary attachment hardware is just \$40.

Barrel Break-in and Eezox™ Gun Care

Our most frequently asked question from customers purchasing a new Bullberry barrel is "How do you recommend breaking in my new barrel?". The stock answer is, "With a premium factory-lapped barrel in your hands the break-in has already been done." This is true, but we also want you to take care of your new barrel.

We feel strongly that you should apply a synthetic bore treatment product in order to prevent any type of fouling. We furnish a sample of Eezox™ Premium Gun Care with all new barrels in an effort to save you time, energy, and most importantly give you the most accurate firearm possible.

Use Eezox™ to clean your barrel initially and after every shooting session. The simple process of pushing a few wet patches followed by a tight dry patch will usually suffice . . . no need to overdo it! Gray residue will show on your final patch. Don't work to remove this as it will offer continued lubrication and treatment without danger of buildup. Eezox™ is great for properly cleaning older barrels and firearms too. Even barrels that have been slightly copper-fouled can be cleaned using very fine steel wool dampened with Eezox™. This will always be a more successful choice than an ammonia-based copper solvent, as Eezox™ will NOT open the microscopic pores in your barrel metal which leads to worse fouling in the future.

Eezox™ is available in a variety of sizes to meet your needs.

Premium Quality Replacement Contender®/G2® Barrel Pricing:

| | Blued Chrome-Moly | Stainless Steel |
|----------------------------------|-------------------|-----------------|
| 12 inches and under | \$329 | \$359 |
| From 12 inches to 15 inches | \$379 | \$409 |
| From 15 inches to 22 inches | \$439 | \$469 |
| From 22 inches to 26.5/27 inches | \$469 | \$499 |

- All .17 calibers add \$30 to corresponding prices listed above
- Select calibers in blue & stainless add \$100 to listed prices above: .20, .270, .321, 9mm, .357/.38, .358/.35, .41, .451
- .40 and .429/44 caliber barrels in blue add \$100; in stainless add \$160
- .375 and .458 calibers barrels may require a premium of up to \$100
- Barrels in longer lengths may be available at additional cost

| | Blued Chrome-Moly | Stainless Steel |
|------------------------------|-------------------|-----------------|
| 209 x 45 and 209 x 50 Pistol | \$509 | \$559 |
| 209 x 45 and 209 x 50 Rifle | \$579 | \$629 |

Custom Barrel Profile for the Contender®/G2®

While a bull profile is the standard for our Contender barrels, we will taper your barrel to your specifications. If a heavier-than-bull barrel is what you are after you can request a step-up in profile past the lock-up area — to most standard dimensions. Depending on the barrel diameter you choose alteration to standard Contender scope mounts/sights or the installation of Encore accessories may be necessary, in addition to special forearm work.

Custom Barrel Add-Ons

| | |
|--|-----------------|
| Bullberry muzzle brake (integral recoil system) | \$125 |
| Threaded muzzle for pre-purchased attachment(s): | |
| without thread protection cap | \$115 |
| with thread protection cap | \$140 |
| Bullberry thread-on muzzle brake with protection cap | \$250 |
| Muzzleloader ramrod with belt pouch | \$40 |
| Drilling and tapping for scope and/or iron sights | no extra charge |
| Long dovetail spacing for factory rifle forearm and/or long hanger | \$35 |
| Muzzleloader ramrod with belt pouch | \$40 |

"World Famous for Accuracy"

We at Bullberry Barrel Works, Ltd. have received worldwide recognition for our sub-MOA accuracy guarantee. Simply put, this means every barrel must be capable of placing five shots into an inch group at 100 yards when used with our exclusive "Woodsmith" forearm system. If this fails to occur we will repair, replace or refund the cost of your barrel.

*These calibers are only available for use in the G2® action, not the classic Contender®. These barrels will be marked specifically for this limited use. This is a safety precaution not to be ignored.

Non-Bullberry Encore®/ProHunter™ Barrel Alterations

Improve the accuracy of your other Encore barrels with our free-floating hanger system. We will modify your barrel for \$40 plus return shipping to fit our Woodsmith forearms, maximizing your barrel's accuracy potential. Call with any questions.

WOODSMITH

WOODSMITH CUSTOM CONTENDER®/G2® AND ENCORE®
REPLACEMENT STOCKS, GRIPS AND FOREARMS

Stocks are individually made to suit your needs. The length of pull, comb shape, etc. will be determined at the time of your order. Specify right handed, left handed or ambidextrous. Pistol grips are also made to suit each individual – send a tracing of your outstretched hand for best fit.

Semi-finished woodwork:

- Fully shaped and inletted; butt pad installed on stocks

| Grades | Buttstock | Target & Sporter Forearm | Schnabel Forearm | 2" Wide Splinter Forearm | Pistol Grip |
|----------|-----------|--------------------------|------------------|--------------------------|-------------|
| Utility | \$200 | \$80 | \$100 | \$95 | \$130 |
| Standard | \$225 | \$85 | \$105 | \$100 | \$140 |
| Medium | \$250 | \$90 | \$110 | \$105 | \$150 |
| High | \$275 | \$95 | \$115 | \$110 | \$160 |

Finished woodwork:

| Grades | Buttstock | | Target & Sporter Forearm | | Schnabel Forearm | | 2" Wide Forearm Splinter, Sporter or Target | | Pistol Grip | |
|----------|------------------|-------------------|--------------------------|-------------------|------------------|-------------------|---|-------------------|------------------|-------------------|
| | Satin Production | Satin/Gloss Epoxy | Satin Production | Satin/Gloss Epoxy | Satin Production | Satin/Gloss Epoxy | Satin Production | Satin/Gloss Epoxy | Satin Production | Satin/Gloss Epoxy |
| Utility | \$260 | \$350 | \$120 | \$170 | \$140 | \$190 | \$150 | \$200 | \$160 | \$210 |
| Standard | \$285 | \$375 | \$125 | \$175 | \$145 | \$195 | \$155 | \$205 | \$170 | \$230 |
| Medium | \$310 | \$400 | \$130 | \$180 | \$150 | \$200 | \$160 | \$210 | \$180 | \$250 |
| High | \$335 | \$425 | \$135 | \$185 | \$155 | \$205 | \$165 | \$215 | \$190 | \$270 |

Exhibition grade woods are available both semi- and fully finished. Exhibition grade woods are finished in Epoxy (satin or gloss) unless otherwise requested. Each blank is individually priced, as no two stocks are alike. Photographs are supplied upon request for selection approval.

Woodsmith services are available for custom bolt-actions, most commonly when ordered with a rebarrel on your supplied action, or as a full custom gun. Please call with any questions. Options are nearly endless with the same attention to detail, custom fit and manufacturing guarantee that you have come to expect from a Bullberry firearm.

- Forearm prices reflect lengths from 7-12 inches at your request
- Forearms longer than 12", add \$30 to Target/Sporter style prices
- Forearm more than 2" wide add \$20 to Target/Sporter style prices
- Add a cheekpiece (standard or rollover to any custom stock) add \$75/\$125
- Upgrade from Pachmayr Old English to Decelerator butt pad add \$40
- Installed contrasting forearm tip (\$40 alone) and grip cap (\$25 alone) \$50
- Installed sling stud (in forearm, grip or stock) \$10 each
- BB grip draw-bolt with attached sling stud \$25
- Finger grooves on buttstock \$60

We work with four laminate tones priced as Standard Grade. These laminate color schemes are typical for firearms and will match similar products from other stock manufacturers, though dye-lots differences may display slight variation; select from Charcoal Silvertone, Green Mountain Camo, Nutmeg Brown, or Royal Jacaranda. Additional laminates are available at High Grade pricing. View these additional options on our website or call for more details.

We also offer synthetic forearms suited for our free-floating hanger bar system in black and camouflage (Encore only). These forearms are externally identical to the standard Encore synthetics. The interiors are modified to accept our system and mount to the hanger bar with only one screw.

WOODSMITH CUSTOM RIFLE STOCK (1 & 2 PIECE) BLANKS:

| Grades | Black Walnut | English Walnut | Bastogne or Claro Walnut |
|------------|--------------|----------------|--------------------------|
| Utility | \$150 | N/A | N/A |
| Standard | \$225 | N/A | N/A |
| Medium | \$350 | N/A | N/A |
| High | \$500 | \$450 | \$550 |
| Exhibition | from \$650 | from \$600 | from \$700 |

BULLBERRY BARREL WORKS, LTD.

Scopes

Call on scope prices for you custom barrel order. Our prices are competitive and we will also mount and bore-sight ordered scopes for you at your request for no additional cost. This is offered as a courtesy to barrel customers.

Scope and mount installation, including bore-sighting, is available on other barrels/firearms for just a \$35 fee. Additional charges for drilling & tapping may be required.

Trigger Adjustments

Original Contender®, G2®, Encore®, ProHunter® & Endeavor® action trigger adjustments are available for \$60 plus return shipping. Send your frame with a signed request stating the specific pull you would like. Not only will we set the pull, but lessen the felt creep by creating a glass-smooth sear surface for optimum engagement, as well as install an over-travel screw if needed. Actions ordered with our custom barrels can include a trigger adjustment for just \$25.

| bolt action follower/carrier | \$50 |

CUSTOM ENGRAVING SERVICES

There are nearly endless font and graphics choices so prices are determined as designed to suit your requests, just like with our barrels and woodwork. If you see something that sparks your imagination, you have a nickname you want to label your barrel with, or you have a business logo you want to see on your next firearm, simply contact us with your ideas.

| | |
|---|-----------|
| Text engraving on barrels and frames | from \$20 |
| Graphic engraving on barrels and frames | from \$45 |
| Scroll engraving (pattern optional) on T/C® frames (not available on Weathershield finishes) | from \$60 |
| Text or graphic engraving on accessories (metal gripcaps, synthetic stocks/forearms, etc.) | from \$25 |
| Custom graphic design services for outside projects | \$80/hour |

Custom engraving on other firearms or non-firearm products may also be available. Contact us with your specific requests for pricing and availability.

Note: most Stainless used barrels and frames sent to us for engraving work will be refinished as part of the engraving process. If you would like your blued barrel(s) or frame(s) refinished before adding custom engraving please specify that when sending in your item(s). This work will add \$60 (barrel) to \$80 (frame), as the process involved includes multiple finishing stages as well as a full cleaning and testing of your frame's proper function.

CUSTOM CHECKERING SERVICES

Checkering is offered as an add-on to any custom woodwork order. The process is done after an initial finish layer is applied. Items then receive their final finish, sealing the raw diamond cuts and creating a uniform appearance. We recommend checkering be paired with our Epoxy finish.

Hand Checkering

| | |
|---|------------|
| Stock grip and forearm panels: full fill pattern | \$300 |
| Wrapped stock grip and forearm: full fill pattern | from \$350 |
| Point, Fleur and Spade patterns | from \$250 |
| French skip-check pattern | adds \$100 |
| Solid or open border | adds \$75 |
| Custom pattern determined by you and Bullberry's designer | from \$300 |

Standard features: 20 lpi, 90- or 60-degree points (determined by wood blank's hardness/grain density), 1:2.5 or 1:3 diamond ratio.

Laser Checkering

This process is used when patterns not possible with hand tools are requested (i.e. fish scales). Pattern/space limitations exist due to the process involved. Please call with your specific request. Prices for laser checkering, including design, start at \$100 for a buttstock, \$180 for a stock and forearm.
